Azaleas \$30 Per Hundred

ALL PRICES ARE F.O.B. SUMMERVILLE

Camellia Discounts on Grafts.

Terms are strictly cash with order.

5% discount on orders of \$50.00.

10% discount on orders of \$100.00.

No. C. O. D. Shipments made.

No guarantee with plants except that they are true to names as I know them.

This list is extensive because of continuous search for new varieties of merit. Some varieties of both Azaleas and Camellias are being added and some dropped each year.

Plants packed in very light, but strong crates, for less expense to customers. Balls are not too large because roots are pruned regularly.

Smaller sizes of Azaleas are wrapped 5 or more to a bundle.

NO CHARGE FOR PACKING

Because it is best to move Camellias and Azaleas in fall or early winter, I advise early ordering.

Stock is limited in some varieties.

SPECIMEN PLANTS

THESE ARE STRONG GARDEN GROWN

(NOT FIELD GROWN) PLANTS

All plants are high quality; with junctions well healed over in grafted plants, and with extra fine root systems, which will come to you almost intact out of rather sandy soil. They should do well in any soil in which they are placed without removing the burlap.

Each plant is inspected before it goes out, so that no weak or diseased plants should get by. Every plant should be good for its class.

If you like the plants, please recommend them to your friends.

Write for information on any varieties in which you are interested, whether listed or not.

AZALEAS

Azaleas from the Allan Nursery have been widely known for quality and strength of their root systems for years. This year, for the added convenience of my customers, there are listed below most of the more important varieties in stock.

Each year more new varieties will be added from the introductions of other nurseries and also from my own seedlings, of which Eleanor Allan is the first of quite a few very fine ones.

INDICA AZALEAS

CRITERION—A very beautiful variegated flower in a compact plant. Late.

DUC de ROHAN—About the color of Pride of Summerville but a stockier plant. Midseason.

ELEGANS—(Early Pink.) Not very hardy but a fast growing, beautiful variety. Early.

EARLY SALMON—This is similar to Elegans but the flowers are light Salmon. Early.

FISHER PINK—Similar in growth habit and blooming period to Pride of Summerville but the flowers are clear pink. Midseason.

FIELDERS WHITE—Well-known, early mid-season white.

FLAME (President Clay)—Well known hardy and fast growing Flame Red. Early Midseason.

FORMOSA—Fastest growing and one of the most satisfactory of the Indicas. Midseason.

GEORGE LINDLEY TABOR—Hard to describe, but a most beautiful variegated flower of large size on plants of good vigor. This variety has gained in popularity steadily since it was first put on the market. Midseason.

GEORGE FRANC—An old standby with huge flowers of deep pink with a deep rose throat. Early.

GULF PRIDE—Medium-sized flowers of the most beautiful shade of Lavender. Early Mid.

JERSEY BELL—One of the famous Pericat Hybrids that has many qualities of the Indicas but with medium sized hose in hose flowers of salmon pink. Fast, compact grower. Mid-season.

INDICA ALBA—Early, tall and hardy White.

JUDGE SOLOMON—This wonderful Azalea should be listed in a class by itself, because

it is a true sport of Formosa with huge Pink flowers. It has all of the many wonderful qualities of Formosa plus the fine color of the Pride of Mobile Azalea. This variety is almost bound to become the most popular Indica variety.

LILACINA—Very large flowers of a soft lavender shading deeper at the throat. Hardy and tall. Likes a moist location. Much admired. Early Midseason.

MRS L. C. FISHER—Another of the Pericat Hybrids, with many characteristics of the Indicas. Deeper flower than Jersey Belle, but similar. Foliage is very dark, shiny and narrow like the Macranthas. Midseason.

MATAPAN—A new white, thought by some to be better than Fielders. Early Mid.

PRIDE OF SUMMERVILLE—One of the very best and most reliable of our Southern Azaleas. Very hardy and a fine performer. Soft Salmon Pink color. Midseason.

PRIDE OF MOBILE—One of the most popular varieties along the Gulf Coast, but a little tender north of that section. Possibly the variety Judge Solomon will replace it in popularity in colder climates. Early.

HYBRID OF UNKNOWN ORIGIN—This variety has large hose in hose flowers of a wonderful shade of light pink. Reasonably hardy, sturdy growth and bell-shaped beautiful flowers. Identified as No. 72 here, it is very much sought after by visitors to the Nursery.

Prices of the above Azaleas, except Criterion, Judge Solomon, Lilacina and No. 72. Add 15c per plant for these four:

	Each	Per 100
10" in height.....	50c	\$40.00
12" in height.....	75c	60.00
16" in height.....	\$1.00	75.00

Larger sizes in some varieties.

KURUME AZALEAS

APPLE BLOSSOM—Strong, hardy, fine bloomer, with glossy foliage and beautiful Salmon and White flowers.

BLACK HAWK—This is a hybrid that resembles the Kurumes but is not as hardy. Flowers

are the deepest shade of red of any Azalea I have seen, and very worth while if you have a protected place.

CORAL BELLS—Very bushy plant with foliage like Boxwood. Small flowers in clusters are coral pink. Wonderful for borders.

COPPER BELLS—Similar to Coral Bells in many respects but color of flowers is Orange copper.

ELEANOR ALLAN—With due humility, the finest Pink Kurume. This is a seedling of Hinodigiri and resembles it in growth habit and performance but flowers are a most beautiful glowing pink. Every Nurseryman who has seen it has ordered a supply.

HINODIGIRI—Still the most popular red.

PAINTED LADY—A Dwarf variety with white flowers speckled and streaked with red. This is a very pert and saucy little Azalea. Hard to propagate and slow to grow, but makes a beautiful plant with glossy foliage and very compact habit. Branches sporting solid color may be removed to retain the effect.

PEACH BLOW—A fast growing and lovely soft Salmon Pink that will grow to eight or ten feet in favorable circumstances. Heavy bloomer and most satisfactory.

SALMON BEAUTY—Bushy but strong growth, with shiny foliage and a profusion of very large (for Kurume) flowers. One of the best of the Kurumes, and very widely used by florists for forcing.

SNOW—Probably the best White Azalea for all purposes. Grows fast, very shiny and good foliage, and very dependable with a profusion of fairly large hose in hose flowers. Use it in borders or in your group plantings of either Kurumes or Indicas and it is outstanding.

Prices of the Kurume Azaleas, with the exception of Black Hawk, Copper Bells and Painted Lady. Add 20c each for these three varieties:

	Each	Per 100
8" spread -----	50c	\$40.00
10" spread -----	75c	60.00
12" spread -----	\$1.00	75.00

Larger specimens available in some varieties

CAMELLIAS

OWN ROOT CAMELLIAS

All of these plants are three or more years old, and are not graded by height alone, so no sizes are listed. One variety may be only 12" tall, but be bushy enough to be worth as much as a 24" plant that is spindly. They are grown for root strength and will have it.

Name of Variety	Price Range
Campbell Ashley -----	\$3.00 to \$4.00
Daikagura -----	4.00 to 6.00
Mathotiana -----	4.00 to 12.00
Mathotiana Var. -----	5.00 to 10.00
Duchess of Sutherland -----	4.00 to 6.00
Herme -----	4.00 to 5.00
Debutante -----	4.00 to 7.50
Prof. Sargent -----	5.00 to 7.50
Pink Perfection -----	3.00 to 7.50
Alba Plena -----	2.00 to 7.50
Elegans -----	3.00 to 5.00
Mrs. Walter Allan -----	7.50 to 10.00
Pearl Harbor -----	4.00 to 6.00
Rev. John Bennett -----	3.00 to 5.00
Frizzlewhite -----	5.00 to 6.00
Dr. H. G. Mealing -----	4.00 to 6.00
Kumasaka -----	4.00 to 5.00
Blush Hibiscus -----	3.00 to 5.00

Please do not compare these prices with those of Nurseries that force their plants to 18" growth in one season.

Many other varieties in various sizes but too few to list.

CAMELLIA SASSANQUA

Camellia Sassanqua Cleopatra has been found to be one of the very best for understock purposes and I am glad to be able to offer this fine variety in extremely bushy plants for this purpose or for specimen use. This variety also makes a very fine and dense hedge. Quantity prices allowed.

Sizes from 24" to 48" and a few liners.

Some plants of Rosea and Minnenoyuki also available.

MISCELLANEOUS PLANTS

	Price
Osmanthus Fragens (Tea Olive) 18-24"-----	\$2.00

All of the above grafts are two to eight years after grafting, and should not be compared with the prices per foot of one-year grafts. Most of them are well budded.

All varieties marked with an asterisk are higher priced because of very slow growth habit or because they are very new and rare.

Prices on grafts not marked with an Asterisk are given below:

18 inches	\$12.50
24 inches	15.00
30 inches	17.50
36 inches	20.00
42 inches	22.50
48 inches	25.00

NEW CAMELLIA MRS. WALTER ALLAN

Stamen-Featured Camellia Excites Local Attention

This camellia flower bloomed on a bush that came last week to Mrs. Earle Kluttz, 520 South Fulton Street, from the originator, Walter Allan Nurseries, Summer-ville, S. C. It is named Mrs. Walter Allan.

News of its arrival soon spread among other camellia enthusiasts in town, who came to see the more than five-foot plant almost before it had been placed in its new setting. It was a gorgeous sight, a plant of fine slender upright stems, rich foliage, and many fully opened rose red blooms with prominent and numerous yellow stamens, the latter so vivid as to resemble a fluffy brush.

Mrs. Kluttz had read about the Mrs. Walter Allan variety in the American Camellia Society Year-book, and she liked what the originator said about it: "Flowers consistently large and almost impervious to frost and cold unless they are old ones and the temperature is extremely low. Flowers have lasted on plants over two weeks and sometimes die and have to be pulled from plants weeks later. Longest lasting flower I have ever seen or heard of. Blooms from early January

through February and sometimes in March. Both plants and flowers seem to be extremely hardy."

Mr. Allan wrote Mrs. Kluttz that the plant which he named for his wife, first bloomed in 1940, when it was five or six years old. It came from seeds probably of Donckelaari. On the original plant the flowers varied from eight petals to 12 or 13. Some had petaloids. From grafting it now has blooms of full double form on some plants with no stamens showing among the petaloids. Flowers have averaged over five inches, and some are as double as those of Chandleri Elegans, while others have the wide open semi-double form with the puff ball center of stamens as shown above. No matter how variable, this is a breath-takingly beautiful camellia.

Mrs. Kluttz has been raising camellias outdoors for about five years. Her first was Monarch, a late double pink. At first she fancied only the formal or imbricated varieties like Pink Perfection, Alba Plena and K. Sawada, but while her collection has been growing, her taste has enlarged also. Now she likes also the

dainty singles, the airy semi doubles, the florid peony types and the giants with featured stamen centers. She still prefers a few perfect blossoms to a bushful of average quality. Emphasis at present is on hardiness, because, after all, Salisbury is supposed to be outside the camellia-growing belt by some miles and several degrees of temperature.

The varieties in Mrs. Kluttz's camellia landscape groupings at the sides of her home have come from California, Oregon, South Carolina, Georgia, Wilmington, N. C., Florida and Alabama. Her selections include, in addition to this big beauty Mrs. Walter Allan, and Monarch, the following others, all of which have commendable characteristics: September Morn, Bessie MacArthur, Gen. George Patton, Mathotiana Alba, Eleanor Haygood, Daikagura, Casa Blanca, Reticulata, Herme Sport No. 2, Kumasaka, Hearn's Pink Dawn, Flesh Pink Peony, Monjusi Red, Emperor of Russia, Pink Glory, Regina des Gigantes, Arajishi, Rosea Superba, Mrs. K. Sawada, Spectabilis, Empress, Red Daikagura, C. M. Hovey, California, Prince Charming, and two sasanquas, Snow on the Mountain and the double pink Showa-no-sakae.

(The above was taken from the January 18, 1950, issue of the Salisbury (N. C.) Post.)

CAMELLIA SEEDLINGS

Listed below are some of my Camellia Seedlings:

James Allan: 4 to 5 inch bloom opening from a large bud to a flat almost single to twenty or more petals, Semi Double. Firey Red with many flaring and prominent golden stamens. A beautiful and showy flower which lasts well on plant or cut. Strong grower.

Mrs. Walter Allan: A large Semi Double flower, 4-5 inches, with prominent stamens showing from flowers, sometimes pendent sometimes erect. Very strong and upright but rather slender growth in grafted plants. Color, clear rose red. Extremely long lasting flowers.

Glenn Allan: A huge and beautiful regular semi double deep rose red flower on a compact and slow plant that is extremely strong and upright. Beautiful round, dark and glossy foliage. Long blooming season with largest blooms late in season.

Henrietta M. Allan: A full double imbricated medium sized, clear pink, with some stamens sometimes when wide open. Many petals. Compact grower. Good foliage.

Grace Hutchinson: Fully imbricated, deep rose, with many petals fading lighter at the center. Compact, strong growth. Fine foliage.

Dr. H. G. Mealing: A very large blood-red heavy SD flower, opening from large buds rather late in season. Petals are heavily veined and have distinctive character of formation. A strong grower and good bloomer. Dark rounded foliage.

The New Hardy Kurume Azalea

ELEANOR ALLAN

PLANT ALMOST IDENTICAL WITH

HINODIGIRI

Except that color of flower is clear pink. Size and shape of flower and foliage resembles Hinodigiri but plant is probably more compact and a stronger grower.

Sizes: 8" spread -----\$50 per 100

12" spread ----- \$1.00 each

16" spread ----- \$3.00 each

24" spread ----- \$5.00 each

This variety is fast becoming one of the most popular Kurumes.

Many New and Beautiful Hybrids
